CONTRACT RENEGOTIATIONS

Committee on Ways and Means: Completed its deliberations on renegotiation of contracts (H. R. 1270), and requested that the chairman introduce a clean bill reflecting the changes in this measure agreed upon by the committee. Chairman Doughton stated that it is anticipated that the new bill will be introduced this Friday, January 19, and will be considered in the House Tuesday, January 23.

The new bill would make subject to renegotiation moneys received or accrued by a contractor and related subcontractors on or after January 1, 1951, in an amount of \$100,000 or more in 1 year where the contracts are made with Departments of Defense, Army, Navy, Air Force, Commerce, the General Services Administration, the Atomic Energy Commission, and other agencies exercising functions in connection with the national defense which the President shall designate.

Contract brokers would be renegotiated for any year in which they have receipts and accruals of \$25,000 or more. A termination date of December 31, 1953, will be provided. Renegotiation articles would be required to be included in all contracts and subcontracts made 30 days after the date of enactment.

The following contracts and subcontracts would be mandatorily exempted:

(a) Contracts with producers of agricultural commodities for the agricultural commodity in its raw or natural state or if the commodity is not customarily sold or does not have an established market in its raw or natural state in the first form or state beyond the raw or natural state in which it is customarily sold or has an established market.

(b) The product of mines, oil or gas wells, mineral or natural deposits where a product has not been processed, refined, or treated beyond the ordinary treatment processes normally applied in order to obtain the first commercially marketable product, but only if such contract or subcontract is with the owner or operator of the producing property. Ordinary treatment processes in the case of mines, wells, and deposits are defined as being those for which a percentage depletion allowance is provided in section 114 (b) (3) or (4) of the Internal Revenue Code. In the case of other products, the Board will prescribe regulations defining ordinary treatment processes.

(c) Timber which has not been processed beyond the form of logs where the contract or subcontract is with the owner of the timber property or the producer of the logs.

(d) Subcontracts directly or indirectly under a contract or subcontract to which the Renegotiation Act does not apply by reason of the mandatory exemptions.

(e) Contracts with States, possessions, Territories, and foreign governments.

In the case of integrated producers of exempted products, the Renegotiation Board by regulation will prescribe a cost allowance substantially equivalent to the amount at which the product could be sold in the state or form required for exemption.

The Board is given discretionary authority to exempt contracts or subcontracts to be performed outside the United States or Alaska; contracts or subcontracts where the profits can be determined with reasonable certainty when the contract price is established or where the time required for performance will not be in excess of 30 days; contracts and subcontracts where the provisions are adequate to prevent excessive profits; contracts or subcontracts, the renegotiation of which would jeopardize secrecy required in the public interest; and contracts and subcontracts where it is not administratively feasible to determine and segregate profits attributable

to activities not subject to renegotiation. The Board may exempt these contracts and subcontracts, both individually and by general classes or types.

An independent Renegotiation Board of five members would be established, to be appointed by the President and confirmed by the Senate. At least three of these members must be from civilian life. Decisions of the Board would be subject to review de novo by the U. S. Tax Court, the decision of which would be final.

Atkinson, president, National Association of Home Builders, voiced approval of the purposes of the legislation as set forth in the policy statement. Committee Meetings

NATIONAL SECURITY AND MANPOWER

Committee on Armed Services: General Eisenhower appeared before the Preparedness Subcommittee to express his views on S. 1, National Security Training Act of 1951, as well as the over-all manpower situation, including selective service and universal military service.

DEFENSE HOUSING

Committee on Banking and Currency: Continuing hearings on S. 349, to assist the provision of housing and community facilities and services required in connection with the national defense (to be cited as the Defense Housing and Community Facilities and Services Act of 1951), the committee received testimony from three witnesses, as follows: Miss Fern Colborn, on behalf of Daniel Carpenter, National Federation of Settlements and Neighbor Centers, New York, testified in support of the bill; Lawrence A. Epter, Mortgage Bank Association of New York, opposed the bill in its present form but favored the reactivation of titles II and VI of the National Housing Act, and the lifting of regulation acts; and L. D. McPherson, McPherson, Inc., Chicago, encouraged the use of trailer homes in the housing program. Committee adjourned subject to call.

RFC

Committee on Banking and Currency: In executive session, the committee received the third interim report by its RFC subcommittee and authorized its submission to the Senate, reserving its decision (following further consideration) on S. 514, to amend the RFC Act to provide for elimination of Board of Directors and to vest management of the Corporation in a governor.

CONTRACT RENEGOTIATION

Committee on Finance: Committee continued hearings on H. R. 1724, to provide for the renegotiation of con-

tracts, after receiving testimony from 13 witnesses, as follows: Col. Willard F. Rockwell, Rockwell Manufacturing Co., Pittsburgh, opposed the bill as accomplishing nothing that could not be done by excess profits tax; the act provides a profit for undetected waste while excess profits tax provides profits for every saving, he said. W. D. Lawson, American Cotton Shippers Association, and Wesley E. Disney, Western Oil and Gas Association, both recommended an amendment to the bill to reinstate provision of the Renegotiation Act of 1943, exempting contracts or subcontracts for production of mines, oil, or gas well, other mineral deposits, timber, and other raw materials, such as agricultural commodities which have been processed, refined, or treated beyond the first form or state suitable for industrial use. Richard B. Barker, Washington attorney, asked for the reinstatement of provision of the Renegotiation Act of 1943 relative to inventory profits. G. Caffrey, American Cotton Manufacturing Institute, Inc., urged amendments relating to the costs of contract on current price basis and mandatory exemption on standard commercial articles sold as result of competitive bid with established ceiling price. Ellsworth C. Alvord, U. S. Chamber of Commerce, recommended that the Renegotiation Act of 1948 be "starting point of new legislation," renegotiation be after taxes, and restricted to defense contracts, averaging devices adopted permitting the carrying forward and backward of losses and the allocation to renegotiation of all costs normal to usual business operations, such as advertising and selling expenses. R. P. S. McDonnell, Washington, advocated increasing exemptions from \$100,000 to \$500,000. Leslie Mills, American Institute of Accountants, suggested amendments relative to organization of the Renegotiation Board's procedures, standards of costs and expenses, definition of "profits," the "risk" factor, and exemptions. George Terborgh, Machinery and Allied Products Institute, suggested either a categorical exemption or a requirement for fractional renegotiation, excluding contracts which have been individually repriced and apply laws only to contracts entered into after December 31, 1950, and to earlier contracts which were renegotiable as of that date under 1948 act. H. E. For-

man, Associated General Contractors of America, recommended that renegotiation be applied to defense contracts which have not been obtained as result of competitive bidding, and mandatory that rules of Bureau of Internal Revenue on cost items apply in final calculation of profits. George Shaffner, Electrical Equipment Representatives Association, recommended an over-all valuation of percentage of profits giving effect to professional nature of services performed. John J. Riggle, National Council of Farmers Cooperatives, expressed concern that renegotiation of farm cooperatives would permeate the whole field of prices. W. A. Rushlight, Portland, Oreg., proposed an amendment to permit carry-forward and carry-back losses.

COTTON EXPORT TO CHINA

Committee on Interstate and Foreign Commerce: Pursuant to S. Res. 56, investigation of administration and enforcement of export policies and control regulations of the U. S., the Subcommittee on Export Controls and Policies heard the following witnesses discuss the export of cotton to Communist China: John Loomis and Gordon Goodsell, both of Department of Defense; Thomas R. Rawlings; L. B. Taylor, L. C. Holmes, and A. B. Book, Department of Agriculture; Matthew Hale and Wallace S. Thomas, Department of Commerce; H. Lee White and Edward L. DEFENSE HOUSING

Committee on Banking and Currency: Resumed its public hearings on H. R. 1272, to assist the provision of housing and community facilities and services required in connection with the national defense (to be cited as the Defense Housing and Community Facilities and Services Act of 1951). but pointed out that this legislation is not needed because most of its provisions already are incorporated in existing law. Mr. Gray and Mr. Goodman both stressed the need of housing for workers in defense areas throughout the country where the defense-production level has increased substantially.

NORTH ATLANTIC DEFENSE

Committee on Foreign Affairs: Met with the Committee on Armed Services for executive discussion with General Eisenhower regarding the North Atlantic defense situation.

Later in the day Representative Richards, acting chairman of the committee, announced a new departure and experiment in committee procedure which he said he hoped would further legislative participation in the formulation of United States foreign policy. He stated that the committee had unanimously approved his plan and voted to call in the authors of all bills referred to it, and give them an opportunity to speak for 15 minutes on behalf of their proposals. Most of these bills and resolutions touch on some phase of our foreign policy. Special hearings for this purpose will begin Tuesday, February 6, and run through Thursday, with additional meetings to follow later. It is thought that this would furnish Members of Congress an opportunity to be heard before the committee's legislative schedule is made up for the session.

Facilities and Services Act of 1951, the committee received testimony from the following witnesses: Richard Perrin, executive secretary, Milwaukee Housing Commission, testified on behalf of the mayor of Milwaukee and the American Municipal Association. As a representative of the mayor, he urged that Federal aid for low-rent housing units not be cut off at this time, and that efforts be made to see that the new housing in defense areas would rent at rates that tenants could afford to pay. On behalf of the American Municipal Association, he stressed the fact that municipalities will need financial aid from the Federal Government to bear the impact of new community facilities as result of defense installations. Mayor Weeks of Aiken, S. C., accompanied by other representatives of the city, explained his situation caused by the selection of a site in South Carolina near Aiken for the new atomic energy plant, and pointed out that the many new community facilities required could not be installed by the small local communities without Federal aid. C. A. Harrell, city manager of Norfolk, Va., testified on behalf of the city council, presenting the particular difficulties of cities such as Norfolk which have much of their taxable land taken over by Federal agencies; he pointed out that in view of this fact, the local community should receive financial aid from the Federal Government in supplying the recreational facilities and other community facilities required to service the Federal population. John C. Williamson, representing the VFW, proposed an amendment to the bill to allow defense workers, who are veterans, to obtain the full benefits of the Servicemen's Readjustment Act of 1944, as amended, in the construction of new homes. Howard Elliott, St. Louis, Mo., suggested an amendment to allow an increase in cost limits where needed in suburban areas of large cities, such as St. Louis, in order to construct housing conforming to the present city planning requirements. Secretary of Defense Marshall announced that the administration planned to send four additional divisions of U. S. troops to Western Europe, and stated that it would be helpful for morale purposes if the Senate could see fit to take affirmative action to approve this

policy. He opposed the fixing of any limitation of the number of troops to be sent to Europe.

FARM MANPOWER

Committee on Agriculture: Opened hearings today on the committee's study of necessary draft deferments for agricultural workers. Maj. Gen. Lewis B. Hershey, Director of Selective Service, testified on the subject, and spoke of the possibility that farmers as well as some essential industrial workers will, of necessity, be inducted for military service. In his statement he also pointed out that Selective Service has taken only a very small number of workers away from the farm compared to the numbers who have been lured away by high wages of industry. J. T. Sanders, legislative counsel, the National Grange, said that the Grange has a vital interest in justified deferment of farm boys from the draft by Selective Service. Robert Engler appeared for the National Farmers Union and stated that the Farmers Union recognizes that agriculture must contribute manpower to the armed services " * * * it wants no blanket exemptions or freeze, but it does feel the need for real standards which would consider the problems of the family farmer in producing the Nation's food needs." Matt Triggs, assistant director of Washington

office, American Farm Bureau Federation, testified that the federation was opposed to any general agricultural exemptions under Selective Service regulations for those desiring to avoid military service, but in the interest of maximum farm production and food price stabilization, he believed increased stock consideration should be given to the importance of maintaining in agriculture those key persons skilled in the operation, farm machinery maintenance, etc. Clarence McCormick, representing the Secretary of Agriculture, Charles F. In a report of its findings during the last Congress the committee stated that the increasing use of chemicals in the production of food raised a serious public health problem, and that the evidence indicated Federal laws are not adequate to protect the public against the addition of unsafe chemicals to food products. It concluded, however, that individuals who would be affected by proposed legislation should be given further opportunity to present their views before specific recommendations were made to Congress.

Committee on Expenditures in the Executive Departments: Continuing hearings on S. Res. 76, disapproving Reorganization Plan No. 1 (RFC), committee heard Frederick J. Lawton, Director of the Bureau of the Budget, oppose the resolution and favor the plan, stating that it incorporates the best features of several proposals for strengthening RFC by vesting responsibility in a single administrator, providing for a loan policy

board yet retaining the board's independent status; Senator Kern favored the resolution and opposed the plan, suggesting immediate consideration of legislation to abolish RFC and transfer its functions to other agencies; Senator Bricker favored the resolution and opposed the plan, stating the plan would be a barrier to consideration of proper legislation to reorganize and improve RFC, and also would prevent adequate consideration of its abolition; Representative Meader favored the resolution and opposed the plan, suggesting that structural changes in RFC be made by legislation, that Plan No. 1 is poorly drafted and would present serious legal questions, and that concentration of vast powers in a single administrator is dangerous. Committee meets again April 3.

Select Committee To Investigate the Use of Chemicals in Food Products: Representative Delaney, chairman, announced today that the Select Committee To Investigate the Use of Chemicals in Food Products will resume hearings on April 12, 13, and 17. The interim report of the committee, issued on January 3, concluded in part, "The increasing use of chemical additives in the production and processing of food has raised a serious problem as far as the public health is concerned," and that "The evidence so far presented indicates that existing Federal laws dealing with the use of chemicals in food are not adequate to protect the public against the addition of unsafe chemicals."

The first group of hearings will have as its witnesses representatives of the Department of Agriculture. Experts on pesticides will discuss the testimony given last year by Dr. Morton S. Biskind, who attributed dangerous toxicity to DDT.

On April 12, the subjects will be chemical additives in food (including the use of hormones and antibiotics in tenderizing poultry and other animals), the use of emulsifiers and milk products in bakery goods, and the use of chemicals for sterilizing milk utensils and in washing butter and eggs.

(4) Any person in active service having a World War I or II policy may continue it in force or surrender a permanent plan policy for cash and reinstate it or be granted a new policy on the same plan and in the same amount without a showing of good health after separation from service. Provision is also made for the waiver of premiums on term policies for individuals in this category and for waiver of a portion of the premium on permanent policies while the individual is returned to service. Section 12 specifically provides that nothing

in the act shall be construed to cancel or restrict in any way rights under insurance contracts issued on or prior to the date of this enactment.

(5) Beneficiaries limited to members of immediate family.

(6) Maximum indemnity paid in monthly installments of \$92.90 each over a 10-year period.

The premium is to be based upon the 1941 Commissioner's Standard Ordinary Table of Mortality with interest at 2¼ percent per annum. In the future all NSLI policies will be issued on this table, which means greatly reduced premiums but no dividends will be payable, and the only plan on which the insurance will be issued will be on the 5-year level premium term plan.

Committee Meetings

FARM PRICES AND PRICE CONTROL

Committee on Agriculture: Charles F. Brannan, Secretary of Agriculture, in a statement today regarding farm prices in the price-control picture, said that farm parity prices are not the cause of the rising cost of living. In an answer to a number of recent public statements allegedly designed to create the impression that agricultural commodity prices are unreasonably or disproportionately high in relation to prices of other consumer goods or to wages or to the farmer's costs, the Secretary said that such an impression was not warranted by facts. He also said that certain statements were not true which indicate that food prices are exempted from price control, or that farmers have been given special or privileged treatment in the laws and regulations providing for inflation control.

Mr. Brannan also said that the purpose of his testimony was not to deny that prices of some foods and farm commodities have substantially increased, but rather to show where they really stand in our economy of general prosperity and full employment.

Committee Meetings

COMMODITY CREDIT—FARM PRICE SUPPORTS

Committee on Agriculture: Heard further analysis of the operations of the Commodity Credit Corporation and the price-support program in the PMA, from Gus F. Geissler, President of the Commodity Credit Corporation and Production and Marketing Administrator, today. He presented the official commodity inventory of the Corporation estimated as of April 23, 1951, and outlined a series of reasons as to why he believes price support has had little to do with current high food prices. In this outline Mr. Geissler pointed out that prices of very few food items are being directly supported; that price-support programs directly affect foods which have weight of only 7 percent over-all cost-of-living index, and only 20 percent in retail cost-of-living index. He also stated that most important items in consumers' food budgets are not under price support, and that foods not supported have much more weight in retail cost-of-living index, such as meat (which represents 26 percent of retail food costs), poultry and eggs (which represents 8 percent of retail food costs), and fruits and vegetables (which represent 20 percent of retail food costs).

To conclude his statement, Mr. Geissler said that large production is the best protection we can get against high food prices; current high prices are the result of limited supplies and high demand; and the price-support program stabilizes supplies available to consumers, and stabilizes prices also.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed."

3. To adopt the following provisions to close miscellaneous tax loopholes:

(a) To disallow business deductions to the extent that they exceed gross income from an enterprise unless the taxpayer can establish by a clear preponderance of the evidence that the business was conducted primarily for profit and not for his personal gratification where the taxpayer has carried on the business for 5 years with an aggregate net loss for the 5-year period of more than \$20,000, if the expenses attributable to such business exceeded the gross income therefrom in 3 or more of the 5 years, for each of these 5 years and for the current year.

(b) To require dealers in securities to clearly earmark securities upon their purchase or acquisition as to whether or not they are held for investment or sale and to not recognize any transfer from one account to the other for tax purposes, and to consider

securities as being in inventory unless they are specifically earmarked as for investment.

(c) To permit only one surtax exemption and only one minimum excess-profits-tax credit to a group of affiliated corporations. An affiliated group would include a group which, under existing law, may file a consolidated return. It would also include two or more corporations with 80 percent of the stock of each owned by the same person or persons. In making the determination of whether an individual owns the stock of any corporation, he would be deemed to own the stock held by his spouse or by a corporation owned or controlled by him, and if he directly or indirectly owns more than 50 percent of such stock he would be deemed also to own the stock held by his ancestors or lineal descendants.

(d) To include in the definition of a collapsible corporation a corporation which is organized to convert profits from sales of inventory and stock in trade into capital gains.

(e) To provide that any depreciable assets sold by stockholders of a closely held corporation to the corporation be considered noncapital assets and to treat the gains from such sales as ordinary gains.

(f) To include United States Government bonds owned by a nonresident alien not engaged in business in the United States in the taxable estate of such nonresident alien.

(g) To require the offsetting of net short-term capital losses against long-term capital gains before reducing the long-term gains or losses by the 50-percent limitation which is presently contained in the law.

4. To adopt the following tentative decisions relating to percentage depletion:

(a) To make no reduction in existing percentage depletion allowances.

(b) To add to the list of nonmetallic minerals which may elect percentage depletion at a 15-percent rate, the following:

and at a 5-percent rate, the following:

Sand, gravel, granite, marble, stone, brick and tile clay, shale, and shell.

(c) To remove the restriction in existing law which only allows the 15-percent rate to thenardite when it is obtained from brines or mixtures of brine.

CONGRESSIONAL BUDGET

Committee on Expenditures in the Executive Departments: Committee began hearings on S. 913, to amend the Legislative Reorganization Act of 1946 to provide for more effective evaluation of the fiscal requirements of the executive agencies of the Government, with four witnesses testifying, as follows:

T. Coleman Andrews, president, American Institute of Accountants, New York, appeared in opposition to the bill because of its method of accomplishment, but agreed with the idea of congressional control over expenditures of the executive branch. He felt that the GAO should be used to provide Congress with the services called for by the bill.

Lewis A. Dibble, representing the NAM, endorsed purposes of the bill on the ground that the objectives enumerated are desirable and should be supported on a nonpolitical basis.

Thomas W. Miles, Washington office of Council of State Chambers of Commerce, in behalf of Alvin A. Burger, research director of the Council of State Chambers of Commerce, stated his organization had taken no formal position on the bill, but was sympathetic with the objective of giving Congress the machinery it needs to evaluate the annual financial needs of the Government.

Robert Ramspeck, Chairman, U. S. Civil Service Commission, suggested modifications to the bill to make clear that its intent was to make available to employees of the proposed Joint Committee on the Budget only those records of an agency which have a bearing on budget estimates and requirements—and not such records of the Commission which are regarded as confidential.

Hearings continue tomorrow.

The committee then directed Senators Long and Cordon to revise the proposed amendments in the nature of a substitute for S. J. Res. 20 (to provide for the continuation of operations under certain mineral leases

issued by the respective States covering submerged lands of the Continental Shelf, to encourage the continued development of such leases, and to provide for the protection of the interests of the U. Effective for taxable years after December 31, 1950. No revenue loss estimate available.

4. *Excess-profits tax, average earnings credit.*—Reduced the credit from 85 to 75 percent of the earnings in the 3 best years in the 4-year period 1946-49, effective January 1, 1951.

6. *Communication and navigation receivers.*—Exempted from excise tax the type used in commercial, military, or marine installations when sold to the United States for its exclusive use. No revenue involved.

7. *Business losses.*—Reconsidered tentative action of May 3, 1951, making subject to disallowance deductions for business losses where they aggregate \$20,000 in a 5-year period, and exceed gross income from the business in 3 or more of the 5 years, and rescinded the tentative action. (Adoption of this proposal would have produced \$15 million in revenue.)

He also recommended that the existing Federal rent-control law be allowed to expire at the end of this month, and spoke in opposition to a proposed amendment which would grant more liberal condemnation power to Federal Government. OVERSEAS ACTIVITIES

Committee on Expenditures in the Executive Departments: Subcommittee held further hearings on S. 1166, to create a commission to make a study of the administration of overseas activities of the Federal Government, with three witnesses testifying generally in support of principles of the bill, making the following observations:

Senator Ives stated that the basic issue involved was whether the Congress should receive an impartial analysis of the manner in which our overseas activities were being administered, prepared by a representative group under the direction of Congress, or whether the Congress must be forced to rely upon material furnished it by the executive branch of the Government, information obtained from newspapers, or periodical literature, etc.; Secretary of Commerce Sawyer said that an investigation of the administrative features of foreign relief and aid was desirable, but felt that a commission of the size and scope proposed in the bill was unnecessary, and made the suggestion that the investigation could be handled by a subcommittee of a standing congressional committee; and Prof. James K. Pollock, University of Michigan, and formerly a member of the Hoover Commission, stated that until Congress establishes some kind of an organizational home for our overseas affairs and we can develop a trained corps of career public servants who are neither military nor diplomatic, but mostly administrative and technical people, we will waste a lot of

money and run the risk of bringing the American program into disrepute.

AID TO INDIA

Conferees, in executive session, on S. 872, emergency food aid to India, reached full agreement and voted to file a conference report on all points of difference between the House- and Senate-passed versions of the bill.

As agreed upon, the conferees accepted the Senate language on financing the loan, which provides that loan funds will, as far as possible, come out of presently available ECA funds; if ECA funds are not sufficient to provide the full \$190 million, the remainder will be financed by public debt transaction.

The Senate conferees receded on the question of repayment in specific strategic materials, and accepted the House language, instructing ECA Administrator to use every effort to obtain as much repayment in as many strategic and critical materials as possible.

The conferees adopted a compromise on the use of interest payments for special purpose (the so-called Mundt amendment). The Senate bill would have provided about \$23 million; the agreement limits the amount available to \$5 million. Under the Senate bill, certain American educational, philanthropic, and other institutions in India, such as CARE and various church groups, would have benefited from the program; provisions covering these groups were stricken out. The agreement added provisions making administrative expenses payable out of the fund and provisions for accountability on vouchers.

Leighty, chairman of the Railway Labor Executives' Association, speaking in support of certain proposed amendments to the act, as spokesman for the 19 standard railway labor organizations affiliated with this association, recommended the use of controls which were successfully employed in the railway industry during World War II. William E. Russell, general chairman of the Metropolitan Fair Rent Committee, urged that the Federal Government should not recontrol housing rents in the State of New York, which has its own rent-control law; and stated that his committee objected to being "shuttled back and forth between the Federal Government and the State." He also asked that the provision in the bill to control commercial rents be eliminated.

Burtram A. Weight, representing the Apartment House Association of Utah and the Utah State Realty Association, opposed any continuation of rent controls, while James F. Cook, Jr., president of the National Association of Building Owners and Managers, generally supported the purposes of the Defense Production Act as a matter of strengthening national defense, but opposed commercial rent control as unnecessary and impractical of administration. E. M. Spiegel, second vice president of National Association of Home Builders, recommended that rent controls "be left in the hands of the local community," and could visualize "no justification for stricter rent control—either on housing or on commercial properties—than was found necessary to impose during World War II."

3. Compensation for widows of deceased veterans who have dependent children and for children where there is no widow increased by 15 percent. No increase for widow without children or for parents.

4. Pension for dependents of deceased veterans of World War I and World War II at the following rates: Widow but no child,

\$48; widow and 1 child, \$60 (with \$7.20 for each additional child); children alone, rates increased by 20 percent.

REVENUE REVISION

Committee on Ways and Means: Reaffirmed the following prior tentative decisions of the committee, subject to the modifications noted below:

1. *Individual income taxes.*—The 12½-percent increase in tax liability upon individuals to be known as a defense tax, effective September 1, 1951. 2. *Corporation income taxes.*—Increased normal taxes on corporations from 25 percent to 30 percent, effective January 1, 1951. Rejected motion to strike from the bill the provision reducing the average earnings credit for excess-profits tax from 85 percent to 75 percent of the earnings in the 3 best years in the 4-year period 1946-49, which provision would become effective January 1, 1951.

3. *Limitation on surtax exemption and minimum excess-profits credit in case of related corporations.*—The minimum excess-profits credit to be allowed to members of a controlled group of corporations (companies of common ownership of 95 percent or more of the voting power of the corporate stock in lieu of 80 percent common ownership as previously agreed upon) would be applied to any one corporation of the group at the election of the taxpayer. The 95-percent control test (in lieu of the previous 80-percent control test) was also applied in the limitation on surtax exemption in the case of related corporations. The foregoing limitations upon the minimum excess-profits credit and surtax exemptions would be applicable only with respect to taxable years beginning after December 31, 1950.

Committee Meetings

MEAT PRICE ROLL-BACK

Committee on Agriculture: Announced that in the interest of both consumers and producers the beef and

cattle roll-back orders should be rescinded immediately. This announcement followed an executive meeting today wherein consideration was given to all evidence submitted throughout the extensive hearings conducted in connection with the orders of the OPS on beef and cattle prices. During the course of these hearings testimony was received from Price Stabilizer DiSalle, Economic Stabilization Administrator Johnston, Secretary of Agriculture Brannan, and other Government officials. The committee also heard beef cattle breeders and producers, feeders, slaughterers, processors, packers, butch-

ers, and retailers, while invitations were extended to consumers and official representatives of consumer groups to appear and testify. It was pointed out that only Government officials appeared in favor of the roll-back, while numerous witnesses representing all segments of the beef industry appeared in opposition to the orders.

The summary of the committee's findings indicated that the issuance of the OPS orders affecting the beef cattle industry was unwarranted and unjustified. Such action was taken without adequate consideration of the factors involved. Such orders will not result in any benefit to producers, packers, handlers, or consumers, and are unfair to farmers who have purchased beef cattle since January 25, 1951, in reliance upon the assurances of Government officials that there would be no roll-back in price beyond that date. They will discourage the production of beef, result in shortages, and create black markets and result in the necessity for rationing and in artificially stimulated demand for other meats, increasing the prices to consumers of pork, lamb, poultry, eggs, and other food commodities.

EXPERIMENTAL SUBMARINES

Committee on Armed Services: Sasser subcommittee approved for reporting to the full committee H. R. 4260, to authorize the Secretary of the Army to transfer to the Department of the Interior the quartermaster experimental fuel station, Pike County, Miss.; H. R. 4024, to authorize certain easements in Texas, California, and Missouri; and H. R. 1227, amending the act authorizing the construction of experimental submarines by raising the cost limitation. The following officials of the Bureau of Ships testified on the experimental submarine bill—Rear Adm. H. N. Wallin, Commander J. S. Bethea, and T. A. Callaghan, Jr.

DEFENSE PRODUCTION

Committee on Banking and Currency: Concluded public hearings on H. R. 3871, to revise and extend the Defense Production Act of 1950, including price control. Representative Hays of Arkansas discussed the subject of industry dispersal. Representatives Patman and Halleck along with other members of the House Select Committee on Small Business were heard in favor of an amendment proposing the creation of a Small Defense Plants Corporation. This will be offered during executive consideration of the measure, which is to begin next Monday morning. Representative Javits stated that the present Defense Production Act has failed to stabilize food prices and advocated the immediate stabilization of these costs. Also heard the testimony of Peter Marchetti, representing the Small Property Owners Association of Omaha, Nebr., who favored termination of the Federal rent-control law. Recessed until Monday morning.

D. C. CIVIL DEFENSE

Committee on the District of Columbia: Teague Subcommittee on Civil Defense heard District Civil Defense Director John E. Fondahl today, who testified regarding the failure of citizens to respond to the need for civil-defense volunteers. This meeting was attended by chief deputies of Director Fondahl's office and all testified regarding the apathetic attitude of the general public toward the defense program. The testimony also indicated a lack of money needed to carry out the proposed purchasing of medical supplies and other equipment.

WAGE STABILIZATION

Committee on Education and Labor: Lucas subcommittee resumed its hearings in connection with the study of the operations and functions of the Wage Stabilization Board, receiving further testimony from Reuben B. Robertson, Jr., president of the Champion Paper & Fiber Co., Hamilton, Ohio, and industry member of the Wage Stabilization Board. Upon completion of Mr. Robertson's statement, the subcommittee then heard Elmer E. Walker, labor member of the Wage Stabilization Board. Others to be heard were the following public members of the Wage Stabilization Board—Clark Kerr, Vice Chairman, Nathan P. Feinsinger, and William M. Hepburn. Adjourned until Monday morning.

Savonis, Merchant Vessel Inspection, U. S. Coast Guard, testified for his third straight day on this legislation. Other witnesses to be heard were Ralph G. Trautvetter, secretary-treasurer, Marine Engineers' Beneficial Association No. 30, Pittsburgh, Pa.; Sheldon G. Bryan, chief engineer of the Marine Engineers' Beneficial Association; John M. Bishop, vice president, National Organization of the Masters, Mates, and Pilots of America; and Albert D. Elledge, president, Harbor Tug & Barge Co., San Francisco, Calif. Recessed until Tuesday morning, June 12.

REVENUE REVISION

Committee on Ways and Means: Reaffirmed the following prior tentative decisions of the committee, subject to the following listed modifications:

1. *Withholding of tax on dividends, interest, and royalties.*—To require withholding of tax at the rate of 20 percent on payments of dividends, royalties, and most payments of interest to individuals after December 31, 1951. Payors would not be required to keep records of amounts withheld for each individual or to submit receipts to individuals. Tax-exempt organizations would be permitted to claim credit for taxes withheld on

payments to them as an offset against their liability for income and social-security taxes withheld from wages paid their employees. Recipients would proceed in filing their income-tax return in a manner similar to that of filing returns where there has been withholding on their salaries and wages. Recipients of these payments in amounts of \$2 or less per year would be permitted to accumulate their refund claims for a period of 7 years and still be permitted to file for refunds.

Form 1099 information returns would be required on payments of dividends and interest of \$300 or more where withholding has been applied.

The staff was directed to work out a plan whereby employers and employees could agree to have withholding of tax on wages or salaries at a rate which would cover full tax liability of the employee.

Withholding would not be required in the case of patronage refunds paid by cooperatives.

Payors of royalties would be required to furnish receipts to recipients and information returns to the Bureau of Internal Revenue on all payments.

The committee rejected a proposal to exempt royalties paid on mineral properties from the withholding provision.

2. *Cooperatives.*—The committee rejected a proposal to tax the unallocated profits of purchasing and marketing cooperatives and to tax them on their capital gains and investment income whether allocated or not. Also rejected a proposal to tax taxable cooperatives on their profits after patronage refunds have been deducted.

3. *Withholding of tax on wages and salaries.*—Increased the amount to be withheld from 18 to 20 percent effective with respect to wages paid on or after September 1, 1951.

4. *Tires and tubes.*—Exempted from tax tires and tubes under 20 inches in diameter used on lawn mowers and toys.

5. *Sporting goods.*—Directed staff to examine items exempted under prior tentative decision which are used primarily in schools to see if children's toys are included in the exempted list. If not, the list will be broadened to exempt toys.

6. *Gain on sale of residence.*—Approved decision to recognize the gain on sale of residence only to the extent the proceeds exceed the cost of a new residence purchased within 1 year before or after sale of the old residence and would give the new resi-

dence the same basis as the old residence. Effective January 1, 1951.

Rejected a proposal to limit the value of land sold with the residence to \$5,000.

7. *Development expenditures of mines.*—Approved a decision to treat expenditures incurred in the development of mines after discovery of commercial quantities as deferred expenses deductible ratably over the period of production. Effective for taxable years ending after December 31, 1950.

8. *Heads of household.*—Approved a decision to grant heads of households one-half of the benefit that married taxpayers now have over single persons from income splitting. Defined the head of a household as an individual who is not married and who maintains as his home a household which has as a member a son or daughter or grandchild if such persons are unmarried. If such persons are married the taxpayer would be considered the head of the household only if he is entitled to an exemption for them under section 25 (b) of the Internal Revenue Code relating to exemptions for dependents. The taxpayer would also be considered head of a household where there are other persons who are dependent on him and he is entitled to an exemption for them under section 25 (b). Effective date, taxable years beginning after August 31, 1951.

9. *Percentage depletion.*—Reaffirmed prior tentative decisions extending percentage depletion allowances to certain minerals and increasing the allowance for coal from 5 to 10 percent and voted to extend percentage depletion at the rate of 5 percent for pumice, scoria, asbestos, and slate. Effective date, taxable years beginning after December 31, 1950.

10. *Gains and losses.*—Approved the decision to require the offset of net short-term capital losses against long-term capital gains before reducing the long-term gains or losses by the 50-percent limitation under present law. Effective date, taxable years beginning on or after date of enactment.

11. *Coal royalties.*—Adopted a provision to treat as capital gains instead of ordinary income.

12. *Livestock.*—Extended capital-gain treatment to livestock held by taxpayers for draft, breeding, or dairy purposes for 12 months or more. Effective date, taxable years beginning after December 31, 1950.

Recessed until tomorrow morning.

Today the committee tentatively approved an extension of the existing law with the following amendments: (1) The effective date for establishing ceiling prices would be changed to that prevailing between January 25, 1951, and February 24, 1951; thus, as agreed to by the committee, this action would prevent price roll-backs beyond January 25, 1951, except for those already in effect; (2) a floor would be placed on the authority of the Federal Reserve Board in issuing regulation W for credit on automobiles by limiting down payments to no more than one-third, and permitting no less than 18 months in which to pay; (3) a Small Defense Plants Corporation would be established, which would be similar to the Smaller War Plants Corporation of World War II; and (4) titles IV (price and wage controls), V (labor disputes), and VI (credit controls) of the present law, as amended above, would be extended to March 1, 1952. This time limitation would also be applicable to rent-control provisions, previously agreed to. Titles I (priority and allocation), II (authority to requisition), III (extension of productive capacity and supply), and VII (miscellaneous) were extended to March 1, 1952, except that contracts entered into under above authority relating to national defense would be continued until

ETHICS IN GOVERNMENT

Committee on Labor and Public Welfare: Subcommittee held hearings on S. Con. Res. 21, to create Commission on Ethics in Government, with Lindsay C. Warren, Comptroller General, and Senator Benton testifying, as follows:

Mr. Warren said the resolution could do much to focus the attention of leaders in and out of Government on the problem, but that although nonpartisan probes have informed and aroused our citizens, constructive measures for strengthening the moral fiber of Government

must receive wholehearted public support. He recommended the complete reinstatement of the 1872 act, which banned former Government officers and employees for 2 years after leaving the service from acting as counsel, attorney, or agent, to prosecute any claim against the United States pending in the departments before they left. He said the renegotiation legislation of World War II exempted the very people most susceptible to temptation, namely, those in the war contracting agencies. Mr. Warren also suggested the reinstatement and extension of the 1919 statute regarding the prosecution of claims for military supplies. Strengthening of the criminal laws on bribery of Government officers and employees was also recommended.

Senator Benton supported a permanent nonpartisan commission on ethics, made up of distinguished private citizens to issue reports each 2 years after elections, in the capacity of referee, to report on "low blows" delivered during the campaign, and to admonish against them.

Committee on Agriculture: Ordered reported favorably to the House H. R. 4475, authorizing the Secretary of

Agriculture to make additional increases in tobacco marketing quotas and acreage allotments where those prevailing are insufficient to meet estimated marketing demands and carry-over requirements. During the open session today the following Members of the House, who have introduced bills on this legislation, were heard on behalf of their respective measures—Representative Abbitt, author of H. R. 3625 and H. R. 4475, the bill which was approved today; Representative Burton, author of H. R. 3626; Representative Harrison, author of H. R. 3627; Representative Stanley, author of H. R. 3639. James F. Thigpen, Director of the Tobacco Branch, Department of Agriculture, furnished a favorable report from that agency. Others heard in support of the subject were C. T. Moses, of Virginia; Jimmy Hubbard, representing the Virginia Farm Bureau; Matt Trigg, American Farm Bureau Federation; J. Mott Roberson, of the Virginia Dark Tobacco Warehousemen Association; and J. H. Meek, of the Virginia Department of Agriculture.

It was also announced that Representative Cooley, chairman of the committee, introduced a bill yesterday (H. R. 4521), extending the Sugar Act of 1948 until December 31, 1956—a term of 4 years beyond its present expiration date—and making minor adjustments in the quotas allotted to the various sugar-producing areas. Hearings on this bill are expected to begin on Wednesday, June 27.

By direction of the committee, Mr. Cooley introduced another bill today (H. R. 4547), which would prohibit all roll-backs in either prices or wages. This anti-roll-back measure will be a proposed amendment to the Defense Production Act revision bill, which is being considered by the House Committee on Banking and Currency, and if not adopted by that committee it will be offered, pursuant to instructions by the Committee on Agriculture, as an amendment to the bill when it reaches the floor.

Adopted Smaller Defense Plants Corporation amendment.

SOVIET EXPORTS BAN

Committee on Foreign Affairs: Battle subcommittee approved unanimously for reporting to the full committee H. R. 4550, a bill to provide for the control by the United States and cooperating foreign nations of exports to any nation or combination of nations threatening the security of the United States, including the Union of Soviet Socialist Republics and all countries under its domination. This measure, which was introduced today, will supersede H. R. 1621 and 1939, similar bills which have been under study for 4 months by the subcommittee studying all aspects of the control of trade with the area behind the iron curtain.

The bill provides that all U. S. military as well as economic and financial assistance will be cut off if the recipient nation permits exports to the Russian bloc

which are contrary to the terms of the act. It would constitute permanent legislation which could be utilized in any future emergency as well as the current crisis and declares it to be the policy of the U. S. to embargo and get other nations to embargo items of military significance in order to increase the national strength of the U. S. and of the cooperating nations. It will also provide tighter as well as broader control than the Kern amendment which it would repeal, and forbids any exceptions to be made in the case of arms, ammunition, implements of war, and atomic energy materials. It will, however, permit the President to continue aid upon the recommendation of the newly created official in charge in the case of other commodities after he has taken into account the contribution of the country to be excepted to the mutual security of the free world. The new act will be cited as the "Mutual Defense Assistance Control Act of 1951."

The complement of the special subcommittee handling this legislation was made up of Representatives Battle (chairman), Burleson, Kelly of New York, Chipfield, and Vorys.

As in the case of the witnesses preceding them, these witnesses also refused to answer pertinent questions regarding association with any communistic group, on the grounds of possible self-incrimination. Adjourned on this subject until next Tuesday morning.

TEMPORARY APPROPRIATIONS

Conferees on H. J. Res. 277, making temporary appropriations through July 31, 1951, for Government departments pending enactment of 1952 appropriation bills, met in executive session and agreed to file a report on the differences between the House- and Senate-passed versions of the bill.

As approved, the House conferees receded on Senate amendments (1) appropriating necessary amounts for projects and activities at rate not in excess of that which prevailed in the first quarter of fiscal 1951 rather than last quarter; (2) providing that Department of Defense rate for operation shall not exceed by more than half that obtaining during last quarter of fiscal 1951; and (3) respecting rate for operations for Department of Defense and other agencies. As to Senate amendment numbered 4, providing for limitation on certain appropriations to a rate not in excess of that for one-third of first quarter of fiscal 1951, House conferees receded with an amendment restricting International Development to not more than \$2.5 million. On Senate amendment numbered 5, concerning Economic Cooperation funds, House conferees receded with an amendment restricting ECA to not more than \$145 million. As to Senate amendments numbered 6 and 7 by which Senate had

eliminated House language providing that funds heretofore appropriated for Mutual Defense Assistance, ECA, and China Area Aid would remain available, Senate receded from amendment 6 (pro forma) and House conferees receded from amendment 7 with an amendment (the effect of these two actions is to limit ECA unobligated balances to carrying out the India wheat program). House conferees also receded from Senate amendment numbered 8, providing that rate of operation for D. C. projects and activities shall not ex-

ceed that obtaining in first quarter of 1951 rather than fourth quarter; and from Senate amendment numbered 9, which added new section barring purchase of passenger autos unless specifically authorized by a fiscal 1952 appropriation act.

One of the principal effects of the conference agreement would be to assure that Mutual Defense program will have, during July 1951, approximately \$900 million of new appropriations as well as approximately \$450 million of unobligated balances for its use.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed."

became treasurer of the American Youth for Democracy in Boston, Mass.

Roos, vice president, Plymouth Cordage Co., and chairman, Cordage Institute Tariff Committee, New York City, returned today in opposition to the measure. He stated that his organization opposed approval because it would cause unemployment in the U. S. cordage industry, and will not ultimately show the farmer a saving in the cost of his twine. When he appeared before the committee before, an inquiry was made regarding the reported shortages of baler twine, and that no shortage existed in fiber. In his statement today he answered this by saying that "there is not and has not been plenty of fiber available. The best proof is, if there had been, prices would not have advanced as rapidly and to the extent that they have." Hearings will be continued tomorrow morning, at which time Mr. Roos will resume his testimony.

FHA CREDIT SERVICES

Committee on Agriculture: Opened public hearings on H. R. 2642 and H. R. 4077, similar bills, which would authorize not more than \$50 million of the total mortgage insurance authorization under the Bankhead-Jones Act to be allotted among the States without regard to farm population or prevalence of tenancy. Representative Jones of Alabama, author of H. R. 2642, explained the objectives of his measure. The following witnesses were also heard in support of the proposed legislation: Dillard B. Lasseter, Administrator of the Farmers Home Administration; J. T. Sanders, National Grange; John Baker, legislative secretary, Farmers Union; Nerl Peek, assistant secretary-manager, National Reclamation Association; and Ralph H. Lavers, director, National Economic Commission, the American Legion. A statement for the record will be filed by John C. Lynn, American Farm Bureau Federation.

FHA Administrator Lasseter stated that the most urgent features of these bills are those provisions in section 3 which amend title II of the Bankhead-Jones Farm Tenant Act, dealing with so-called production and subsistence operating loans, and outlined two primary reasons why the limitations on the size and the total amount of operating loans need be increased. Mr.

Lavers, representing the American Legion, said that by amending the act it would provide a more effective distribution of mortgage loans insured under title I; give holders of such mortgage loans preference in the refinancing of loans on a noninsured basis; and adjust the loan limitations governing title II loans so as to provide more effective assistance to production and subsistence loan borrowers. Hearings were completed, and committee adjourned until tomorrow morning, when it will resume consideration of legislation to extend the Sugar Act of 1948.

SUGAR ACT EXTENSION

Committee on Agriculture: Resumed public hearings on H. R. 4521, to extend the Sugar Act of 1948 from December 31, 1952, to December 31, 1956. This bill would also increase Puerto Rico's quota for marketing on the mainland from 910,000 tons to 1,080,000 tons; increase from 6,000 to 12,000 tons the quotas for the

Virgin Islands; and increase the participation of the full-duty countries supplying our market, besides containing a few amendments affecting quota administration. Testimony was received from Representatives Hale and Fellows, both of Maine; Thurman Arnold, counsel, and Fred H. Harding, both of the American Molasses Co.; and Louis Lang, chemist, who appeared on behalf of the United States Cane Sugar Refiners Association. Representative Hale recommended that the Sugar Act be modified to permit the importation of a limited quantity of West Indies molasses, which has impurities of between 5 and 6 percent, and which is not to be further processed, in addition to the molasses of over 6 percent impurities which is rapidly becoming unobtainable. Representatives of the American Molasses Co. recommended alternate amendments to the Sugar Act designed to remove the hazards which now confront importers of West Indies molasses and yet at the same time cause no interference or harm to the various persons controlled by the act. Mr. Harding stated, "In addition, we have tried to allow latitude for present and potential competitors to operate." He also said that his company believes that its proposal will in no way affect the sugar industry of the United States. Mr. Lang, representing the refiners' association, appeared in opposition to a proposal which in effect would amend the definition of liquid sugar set forth in the act by changing certain percentages. He believed that the proposal would permit the importation of additional liquid sugars which would not be charged against any quota. Hearings will continue tomorrow.

The resolution calls the arrest and conviction a "shocking violation of the fundamental human freedoms guaranteed in the U. N. Charter" and a repudiation of the principle of free information so necessary to peaceful cooperation and friendly relations among the people of

*These figures on measures reported include all placed on calendar or acted on by Senate even if there was no accompanying report. A total of 601 reports has been filed in the Senate; a total of 778 has been filed in the House.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed."

Committee on Agriculture: Ordered the following bills reported favorably to the House:

H. R. 4521, amending the Sugar Act of 1948 by increasing sugar-production quotas of Puerto Rico and the Virgin Islands, and extending powers of the Secretary of Agriculture under the act until December 31, 1956. As reported, the bill was amended to increase from 250,000 to 300,000 gallons the liquid-sugar quota for the British West Indies;

H. R. 4443, to prevent the entry of certain mollusks into the United States; and

Arthur Evans, executive director of the Reserve Officers' Association, testified at morning and afternoon sessions of the Brooks Special Subcommittee on Civilian Components, which is conducting hearings on H. R. 4860, the Armed Forces Reserve Act of 1951. Following General Evans' testimony the committee heard Maj. Gen. Milton A. Reckord and Maj. Gen. E. A. Walsh, both of the National Guard Association. PROCUREMENT

Committee on Armed Services: Hébert Subcommittee on Procurement held executive meeting on committee business. Made no announcement and adjourned subject to call of the Chair.

DEFENSE HOUSING

Committee on Banking and Currency: Ordered reported to the House, with amendments, S. 349, to assist the provision of housing and community facilities and services required in connection with the national defense. The companion House bill (H. R. 2988) was reported on March 6, 1951. On March 14 the rule for its consideration was rejected by the House, which in effect killed the bill.

S. 349 was substantially modified in the Senate to meet some of the objections to certain provisions of the House bill. The total authorization for FHA insurance in the Senate version is \$1.5 billion and its use is limited

to critical defense areas only. This provision was modified by the House committee to provide \$1.5 billion for FHA insurance but does not restrict its use to critical defense areas. Under the Senate bill the amount authorized to be appropriated for housing is limited to \$50 million, and the amount authorized to be appropriated for community facilities is \$60 million. The House provisions increase these amounts to \$75 million and \$100 million, respectively.

Among the noncontroversial items to be agreed upon were continuation of title VIII (military housing); extension of direct loans to veterans; maximum 6-percent down payment on veterans' home loans up to \$12,000; and extension of Lanham Act housing.

The subcommittee will direct its initial inquiry into the distribution of steel under the controlled materials plan. The program for expansion of steel production facilities also will be studied, as well as the distribution and production of the two other controlled materials—

aluminum and copper. Mr. Burton stated that the subcommittee recently has received a number of complaints from small-business men who have been unable to obtain materials allocated to them under the controlled materials plan. He said, "If the program is not taking care of small-business needs, remedial measures must be taken promptly. Small businesses cannot survive a period of confusion and delay in allocating scarce materials."

The subcommittee will call as witnesses officials of the DPA, NPA, and other Government agencies, as well as officials from the industries involved.

RESERVE COMPONENTS

Committee on Armed Services: Brooks Special Subcommittee on Civilian Components resumed its section-by-section reading of H. R. 4860, the Armed Forces Reserve Act of 1951. Will continue on same topic tomorrow morning.

HOME LOAN BANK BOARD

Committee on Expenditures in the Executive Departments: Holifield special subcommittee continued hearings in connection with certain cases in litigation with Federal home loan banks in southern California. Tom Gregory, president of the Long Beach Savings and Loan Association, offered further testimony today. He has made various appearances as a witness on this subject since the start of the hearings. Adjourned until tomorrow morning.

MUTUAL SECURITY

Committee on Foreign Affairs: Ordered reported to the House the Mutual Security Program in the form of a clean bill which is to be introduced tomorrow by Chairman Richards. This new measure will supersede H. R. 5020, the original bill, and is expected to be formally reported by the committee tomorrow afternoon.

In an analysis of the approved measure, Chairman Richards stated that responsibility for all U. S. foreign assistance programs will be placed under a single administrator. It establishes a new agency, the Mutual Security Administration, which will take over the operations of agencies currently responsible for these programs. The one exception is in the case of the procurement and supply of military equipment which remains in the hands of the Secretary of Defense. The foreign operations of the programs will also be consolidated under this single agency.

This program and the organization for administering it will terminate June 30, 1954. While the new Administration will carry on operations authorized by the ECA Act until June 30, 1952, all ECA operations under that act will terminate on that date as originally provided when the ECA began.

The amount proposed for economic assistance for Africa and the Near East in H. R. 5020 was increased by \$50,000,000 with the provision that this amount was to be used for the relief of refugees coming into Israel. There was a reduction in the authorization for Korean reconstruction of \$1,250,000 pending study of that situation when clarified sufficiently.

H. R. 5020, as originally introduced, contained authorizations for \$7,800,000,000 for all types of assistance, a cut of \$700,000,000 below the request of the executive branch. The committee increased this amount by \$48,750,000 to a total of \$7,848,750,000.

Today the committee received constructive suggestions from representatives of the Department of State, the Department of Defense, ECA, and the Bureau of the Budget on the organizational features of this bill, many of which were adopted.

Committee on Labor and Public Welfare: In executive session, Subcommittee on Railroad Retirement Legislation recommended an increase in retirement, annuities, pensions, and a larger increase in benefits for widows and orphans.

It also approved a proposal for a speedy, fact-finding study to determine the amount of the proposed increases which the retirement account can safely sustain without raising tax rates. It was agreed that a decision should be reserved upon the proposal to integrate benefits of employees with less than 10 years of railroad service with Social Security System, the proposal to increase the maximum creditable and taxable compensation from \$300 to \$400 a month, and other issues, pending the conclusion of the above-mentioned study.

Subcommittee hopes to report a bill embodying some of the above issues for Senate consideration during the present session of Congress.

POSTAL RATES, AND POSTAL PAY INCREASE

Committee on Post Office and Civil Service: In executive session, committee voted to report with amendments S. 1046, to readjust certain postal rates. As approved by the committee (in addition to the postal rate changes proposed in the introduced bill), the amendments to the bill adopted by the committee would increase the first ounce of first-class mail from 3 to 4 cents; air-mail postals from 4 to 5 cents; first ounce of air-mail letters from 6 to 8 cents. Second-class mail would be increased over its present rate by 10 percent each year for the first 3 years. The present rate on certain non-profit publications would be retained. The language of S. 1369, readjusting postal rates on fourth-class matter, was adopted as a new section (sec. 4) to S. 1046. In the case of third-class mail, bulk mailing would be increased from 1 cent to 1¼ cents per pound the first year, and to 1½ cents the second year. The rates on special services, as found in the introduced bill of S. 1046, would be retained, with two exceptions: (1) the minimum rates on special delivery would be reduced from 23 to 20 cents, and (2) the old section 11 of the bill would be deleted. A new section 12 would be added, to rescind the Postmaster General's order of April 17, 1950, curtailing the postal-delivery service. A new section 13 adopted to insert in the bill the language of S. J.

Res. 60, which provides for the appointment of a Joint Committee on the Postal Service.

It approved with amendments S. 1335, to readjust downward the size and weight limitations on fourth-class (parcel post) mail.

It voted to report (in the form set forth in Committee Print No. 3) S. 355, amending the act reclassifying the salaries of postmasters, officers, and employees of the postal service so as to reduce the number of grades for the various positions under such act. As approved, the

bill would eliminate the two lowest grades in the postal service, and upgrade by two grades those who entered the service on or after July 1, 1945, unless they had already received these pay advantages by or through other legislation. Salaries of postmasters and supervisors would be adjusted. In addition to the above adjustments, all postal employees would be given an over-all 8.8 percent pay increase, with a limitation that no one would receive an increase in excess of \$800 over the present salary.

APPROPRIATIONS—ARMED SERVICES

Committee on Appropriations: Continuing its hearings on 1952 budget estimates for the various branches of the armed services (H. R. 5054), Subcommittee on Armed Services heard Anna M. Rosenberg, Assistant Secretary of Defense, and assistants, testify on two House amendments involving retirement pay, and inactive and voluntary reserves. Subcommittee meets again August 27.

TAX REVISION

Committee on Finance: In executive session, committee took action on further amendments to H. R. 4473, tax-revision bill, as follows:

(1) It reconsidered its previous tentative vote on raising individual income-tax rates, and tentatively (subject to further study by the committee) agreed to a modified plan to provide an 11-percent increase in present law taxes or an 8-percent tax on take-home pay (surtax net income after deduction and exemptions) after present law taxes, whichever is lower. A termination date of December 31, 1953, is set for the provision. The effective ceiling rate is raised from 87 to 88 percent. The increase is effective as of November 1, 1951, and increased withholding will begin at that time. The increased tax will be integrated into the rate schedule. Burden tables will be released after the rate table is prepared. It is estimated that this will raise revenues by slightly over \$2.4 billion. The comparable estimate under the House bill was over \$2.8 billion.

The change adopted in the head-of-household provision of the House bill has been announced previously. For those qualifying under this provision one-fourth of the benefit of income splitting is made available instead of one-half as provided in the House bill. It is estimated that this will reduce revenues derived from individuals by about \$25 million as contrasted to about \$50 million under the House bill.

(2) The committee struck out the increase in the capital-gains tax rate from 25 to 28.125 percent provided by the House bill for both individuals and corporations.

(3) It struck out the provision providing for withholding on dividends, interest, and royalties, but retained the House provision requiring interest to be reported on amounts over \$100 with discretion in the Secretary of the Treasury to require reporting below \$100.

(4) The House provision providing for additional voluntary withholding under agreement between the employee or employer was retained.

(5) A new provision was added, relieving taxpayers from penalty for additional tax provided by this bill if amended declarations of estimated tax are not filed.

Committee meets again tomorrow.

MUTUAL SECURITY

Committees on Foreign Relations and Armed Services: Meeting jointly in executive session, the committees voted to report with amendments H. R. 5113, to maintain the security and promote the foreign policy and provide for the welfare of the U. As approved by the committees, the bill would authorize a total of \$7,535,750,000, of which \$6,013,000,000 is for military assistance and \$1,522,750,000 for economic assistance. This compares with a total of \$7,498,750,000 approved by the House, of which \$6,013,000,000 is for military assistance and \$1,485,750,000 for economic assistance.

TAX REVISION

Committee on Finance: Following another executive session of the committee for the consideration of H. R. 4473, tax-revision bill, the chairman announced actions on further amendments to the bill, as follows:

(1) It agreed to increase the normal tax rate on corporations from 25 to 27 percent and the surtax rate from 22 to 25 percent. This makes the top bracket rate for corporations with incomes of \$25,000 or less, 27 percent instead of the 30 percent provided by the House-passed bill. For corporations with larger incomes the top bracket rate would be 52 percent, the same as under the House version. This makes the combined income and

excess profits tax rate 82 percent, the same as under the House version.

(2) The ceiling, or maximum on the combined income tax and excess profits tax rate, is to be 70 percent, which also is the same as that provided by the House version.

(3) It rejected the provision of the House-passed bill which reduced the percentage of the average base period net income which may be used in computing the excess profits tax credit based on income from 85 to 75 percent.

(4) December 31, 1953, was set as the termination date for corporate rate increases.

On Saturday, August 25, the committee took the following actions: It disapproved sections 123, on "related corporations", and 310, on capital-gains, of the House-approved bill; and approved sections 305, on capital losses, and 308, on capital gains.

(2) It approved the application of section 22 (b) (9) and (10) of the code, relating to the retirement of indebtedness by corporations for less than par value without recognition of gain (similar to a measure which has previously passed the House).

(3) The following tax treatment of taxable cooperatives was approved: Taxable cooperatives will continue to pay taxes as now provided under existing law with the following exceptions. In the case of patronage dividends deductions will be allowed only if either of the following two conditions are met: (a) The patronage dividends must be paid in cash or merchandise within 75 days after the year in which the patronage occurred; or (b) the patronage dividends must be paid in the form of irrevocable obligations payable within a period of not more than 2 years after the year in which the patronage occurred and the obligations must bear interest at the rate of at least 3 percent payable annually. Such obligations in order to be deductible cannot exceed one-half of the annual profits of the cooperative for the year in which the patronage occurred. In the case of patronage dividends deductible by the cooperative the patron will be required to return in income their face value to the extent that such dividends represent income to the patron. The patrons will not be required to include as income any patronage dividends which are taxable to the cooperatives.

(4) Committee agreed that the exemption provided cooperatives under section 101 (12) of the Internal Revenue Code shall apply only if the following additional limitations are met: (a) 95 percent of the members of the cooperative are individuals; (b) the total assets of the cooperative, exclusive of inventory, are less than \$100,000; and (c) in the case of business done with the United States, patronage dividends are paid to the United States on the same basis as to members.

In an afternoon session, the committee reached the following agreements:

(1) It agreed to give individual income-tax payers who have used a standard deduction when they filed their return the right to change that option at any time within the period of the statute of limitations and claim

itemized deductions. Also taxpayers who had used itemized deductions on their return would be permitted to amend their return and use standard deductions.

(2) Married individual income-tax payers who filed separate returns would be given the right to change their option and file joint returns any time within the period of the statute of limitations.

(3) The committee agreed to tax mutual savings banks as ordinary corporations but amounts paid to depositors or credited to their account are to be allowed as deductions in arriving at taxable income. As in the case of commercial banks deduction for amounts to meet losses on loans based on actual experience over a 20-year period would be permitted. In computing the net income of any mutual savings bank, there would be allowed as a deduction from gross income, in addition to deductions otherwise provided, any amount paid, within the taxable year, to the United States or to any instrumentality thereof exempt from Federal income taxes, in repayment of indebtedness incurred prior to September 1, 1951.

(4) Savings and loan associations, including Massachusetts cooperative banks and Federal savings and loan associations, would be taxed as ordinary corporations but a deduction would be allowed for dividends or interest paid to depositors. A special deduction would also be allowed for amounts placed in bad-debt reserves based upon experience over a prior period.

(5) It accepted in lieu of the House-approved provision, the 6½-percent life-insurance tax formula proposed by the majority of the life-insurance companies, on a 1-year basis.

(6) The corporate rate increases would become effective as of January 1, 1951.

AND EXCESS-PROFITS TAX

Committee on Finance: In executive session, committee voted to report with amendment H. R. 4014, relating to the applicability of alcoholic-tax laws (to confer right upon Internal Revenue Commissioner to subpoena documentary evidence and witnesses as now exercised by FTC); the amendment would authorize a grant of extension of time up to November 15, 1951, to file corporate excess-profits tax returns (contents of S. J. Res. 97).

Following two executive sessions lasting throughout the day, for consideration of H. R. 4473, tax-revision bill, the chairman announced further actions on the bill, as follows:

(1) It agreed to House-approved provisions of the bill: (a) making changes in the base of tax on toilet preparations; (b) increasing tax on coin-operated gaming devices from \$150 to \$250; (c) excluding from cabaret tax incidental refreshments served at ballrooms, etc.; (d) applying the admissions tax to the actual amount charged rather than the established price; (e) and a similar but somewhat more restrictive provision than that of the House, exempting certain admissions from excise tax where the profits inure to churches, schools, etc. (symphonies and operas would be among the exempt organizations; exemptions are also provided for county fairs, civic concerts, and municipal swimming pools).

(2) In case of jewelry tax, it imposed a 10-percent tax on cigarette, cigar, and pipe lighters instead of the 20 percent by House version.

oil or where less than a fair charge is made. In the case of the movement of earth, rock, etc., by contractors within or adjacent to a construction project this tax would not apply.

(5) In the case of the transportation of persons, it was agreed to exclude from application of the tax, transportation by a vessel making an intermediate stop in the United States, Canada, or Mexico on a trip beginning or ending outside the northern portion of the Western Hemisphere if the vessel is not authorized both to discharge and to take on passengers at the intermediate stop. (6) Excise tax on cable and radio dispatches was reduced from 25 to 15 percent; House would reduce rate from 25 to 20 percent.

(7) Tax rate on photographic apparatus was reduced from 25 to 15 percent, without change in the present 15-percent rate on film or in the base of either tax; House would increase films from 15 to 20 percent and reduce tax on apparatus from 25 to 20 percent. House would remove business cost items from bases of both of these taxes.

(8) Committee did not accept the House provision raising bowling alley and billiard- and pool-table tax.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed."

Dr. Earl J. McGrath, Commissioner of Education, FSA, was opposed to that portion of section 7 which would transfer vocational agricultural education from the Office of Education to the Agriculture Department; he felt that the proposal is educationally and administratively unsound.

Dr. C. E. Rhoad, Washington Court House, Ohio, appeared in favor of that portion of section 7 which would transfer vocational agricultural education from the Office of Education to the Department of Agriculture, stating that since the Department was an administrative agency, it would provide more leadership and support for the agricultural education staff in the maintenance of standards and morale.

Edgar Fuller, executive secretary, National Council of Chief State School Officers, testified in opposition to that part of section 7 which would transfer vocational agricultural education to the Department of Agriculture, and suggested a substitute for section 7, providing that the school-lunch program be transferred from the Agriculture Department to the Office of Education.

(3) The Treasury and committee staff were instructed to study and report by April 1, 1952, on possibility of withholding against reserves allocated and on methods used in allocating reserves and the form and character of the certificates issued to the end that one tax—not a double tax—may be actually collected on such allocated reserves.

On Saturday, September 8, the committee took the following actions on amendments to the bill:

(1) It reconsidered its action to remove from the bill the 2 cents per gallon tax on Diesel fuel, added by the House bill, pending further study. (2) It reconsidered its previous action with respect to tax on sporting goods and agreed to raise the rate from

10 percent to 15 percent on the manufacturers' price, but exempted from that tax 17 items in the base of the present tax, specifying numerous other items which would be subject to the tax.

(3) In the case of electric, gas, and oil appliances, sold through dealers by the direct selling of services of the manufacturer, the committee agreed that the Commis-

sioner of Internal Revenue is to determine and apply only the fair, competitive manufacturer's price.

(4) Admissions to exhibitions of gardens and homes, where provided as a historic garden week and where the profits do not inure to private individuals, would be exempted from tax.

MILITARY AND NAVAL CONSTRUCTION

Conferees, in executive session, agreed to file a conference report on the differences between the House- and Senate-passed versions of H. R. 4914, to authorize certain

construction at military and naval installations. The conferees approved the bill primarily in the form as it passed the Senate, with the exception that an Air Force project for construction of facilities to rehabilitate the Seymour-Johnson Air Force Base at Goldsboro, N. C., totaling \$23,368,000, was eliminated. A joint Senate and House subcommittee (consisting of Senators Stennis and Saltonstall, and Representatives Kilday and Short) was approved to make an inspection of several bases in that area to determine the most favorable base to reactivate.

AIR FORCE ORGANIZATION

Conferees agreed, in executive session, to file a conference report on the differences between the House- and Senate-passed versions of H. R. 1726, to provide for the organization of the Air Force and the Department of the Air Force. The Senate bill provided that the Chief of Staff, Air Force, would "under direction of the Secretary of the Air Force, exercise command over the organization and members of the Air Force," whereas the House-passed bill provided that the Chief of Staff would have supervision of the organization and members of the Air Force. The conferees agreed that the Chief of Staff should, under direction of Secretary of Air Force, command combatant organizations and that he should supervise staff functions of the Air Force. The other major difference was that the House-approved bill provided for an organization of three major commands and lesser commands within the Air Force, whereas the Senate bill contained no such language—the Senate conferees accepted this language.

ELECTION LAWS

Committee on Rules and Administration: Guy George Gabrielson, chairman, Republican National Committee, testified before the Subcommittee on Privileges and Elections in response to the chairman's letter requesting him to discuss "amendatory legislation dealing with the expanding use of defamatory or scurrilous literature in a campaign, and also the rapidly mounting cost of conducting elections to these Federal offices which, if allowed to continue, may well prevent candidates of

moderate means from presenting their candidacies to the electorate." Mr. Gabrielson said legislation seeking remedies to these perplexing problems should meet four tests: First, would it accomplish the desired results? Second, would it encourage more of our citizens to vote and take part in political campaigns, or have the adverse effect? Third, would it contribute toward a more informed and enlightened electorate? Finally, would it unduly infringe upon the rights of free men and women in a free Republic?

He told the subcommittee that he would not advocate repeal of the Hatch Act, but that ceilings on receipts and expenditures should be revised at least to compensate for the rise in prices since 1940, and the added costs of new media for the dissemination of public information. He concluded by stating that we need election laws, and they should be enforced more strictly than in the past. "But I suggest again that our objective of cleaner campaigns requires more than laws, and more than enforcement. It requires ethics, morality, and good taste, with the standards set at the top. Nothing less will satisfy a free people determined to remain free," he said.

Subcommittee adjourned subject to call.

ALUMINUM PLANT INVESTIGATION

Committee on Expenditures in the Executive Departments: The Subcommittee on Government Operations announced today that it will begin immediately an investigation of the proposed Government loan of \$46 million to the Harvey Machine Co., of California, for the construction of an aluminum plant in the Flathead Valley of Montana. The investigation was requested by Representative Mansfield in a recent letter to Subcommittee Chairman Hardy. Certain allegations of impropriety on the part of the Harvey Co., in the conduct of World War II business for the Government, have been made by a widely known columnist; also charges of political influence in connection with the proposed loan have been raised by Representative Saylor. All

facts concerning the loan will be explored by the subcommittee, though it has no advance information whatever regarding the charges which have been publicized.

Another phase of the loan which will receive attention concerns the announcement of last Saturday by Defense Mobilizer Charles E. Wilson that several aluminum companies had been requested to move their plants from the Pacific Northwest by reason of a power shortage in that area. It is known that the new Harvey plant was to receive its power from the Bonneville Power Administration. The subcommittee will seek an explanation of why a certificate of necessity granting tax benefits and a defense loan were approved for a new facility to be constructed in an area where power is reported to be short.

CUSTOMS SIMPLIFICATION

Committee on Ways and Means: Completed its work on H. R. 1535, to amend the Tariff Act of 1930, so as to simplify its operation, to reduce expense and delay incident to its administration, and to eliminate inequities which add to the difficulty of enforcement. A clean bill (H. R. 5505), was introduced today incorporating the following amendments which were adopted by the committee—

Sec. 2.—The word “materially” was struck wherever appearing in section 2. The report is to contain a statement to the effect that it is the feeling of the committee that its action in deleting the word “materially” should not be taken to indicate that it wants the Treasury to take action on frivolous, inconsequential, or immaterial cases.

Sec. 11.—Amended by inserting after the word “granted”, on page 16, line 11, the words “to any c. o. d. shipment or.” The report is to state that it is the desire of the committee that the Treasury Department shall, if necessary, take proper action to prevent abuse of section 11 by persons in the mail-order business.

Sec. 13.—Amended so as to provide for the continued use of the American selling price in situations in which this method of valuation is now available.

Sec. 16.—Amended section 498 of the Tariff Act of 1930, so as to cover all articles entitled to free entry under paragraph 1631. (Sec. 1631 provides for free entry of books, maps, music, photographs, etc., by educational, religious, etc., institutions, State and public libraries, and colleges and other schools of learning where such articles are not imported for sale.)

In addition to the actions listed the following actions were taken, or decisions were made:

Sec. 7.—In considering this section the committee discussed the possibility of permanent legislation providing for free entry of exhibits for fairs, etc., and it was decided that a separate bill should be drafted on the subject by the Treasury Department.

Sec. 8.—H. R. 3711, prohibiting the temporary free importation of photoengraved printing plates imported to be reproduced, was discussed during consideration of section 8, and it was decided that the problem relating to all items imported free of duty “for examination with a view to reproduction” should be considered along with H. R. 3711 at a later date.

Sec. 23.—A motion to repeal the 3-cent-per-pound processing tax on coconut oil and other oils was ruled out of order as not being germane to a customs simplification bill. It was decided that, before any action should be taken on an outright repeal of the processing taxes, hearings should be held.

No amendments were made in sections 1, 3, 4, 5, 6, 7, 10, 15, 18, 21, 23, and 25; and technical amendments were adopted in sections 8, 9, 12, 17, 19, and 20. Sections 14, 22, and 24 were stricken from the bill; while new sections were added as follows: (1) eliminating the requirement that customs documents be notarized and requiring a written declaration under penalty of perjury in lieu thereof, and (2) providing that the enactment of the bill shall not be construed to determine or indicate the approval or disapproval by the Congress of the executive agreement known as the General Agreement on Tariffs and Trade.

*These figures on measures reported include all placed on calendar or acted on by Senate even if there was no accompanying report. A total of 844 reports has been filed in the Senate; a total of 1,081 has been filed in the House.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed."

INTERNAL REVENUE STUDY

Committee on Ways and Means: King Subcommittee on Administration of the Internal Revenue Laws opened hearings today in connection with its study of the causes of recently revealed irregularities in collectors' offices throughout the country. John B. Dunlap, Commissioner of Internal Revenue, was the first witness, testifying during the morning as well as part of the afternoon session. He was followed by Lewis Ligibel, deputy collector at St. Louis, Mo.; Henry Rathert, special agent at the same collection district; and James P. Finnegan, former internal revenue collector at St. Louis, Mo. Hearings will be continued tomorrow morning.

Chairman King, in a statement released prior to today's meeting, stated in part—

We have heard all manner of criticisms concerning the Bureau. We are told that taxpayers with an "in" receive unduly favorable treatment; that many Bureau employees have outside income—the particulars of which are often not explained; that there is little supervision by the Bureau of matters in which the various collectors of internal revenue are involved; that racketeers and gamblers receive tax treatment not accorded to ordinary taxpayers; that persons admitted to practice before the Treasury Department are not held to the standards of deportment normally required of professional people; and that red tape, duplication of function, and the like are prevalent in some parts of the Bureau of Internal Revenue. These are all serious charges, and we intend to examine them fully.

We will begin with an examination of these matters insofar as they are related to the offices of the 64 collectors of internal revenue. The collectors are doubly important to our study, because it is with their offices that most taxpayers have their only contact and because many of the charges I have mentioned have a particular relation to collectors' offices.

Gus P. Geissler, Administrator, Production and Marketing Administration, Department of Agriculture was the first to testify. He reviewed agriculture's requirements for farm machinery, equip-

Wendell Butler, of Waterloo, Iowa, president, Allied Farm Equipment Manufacturers Association, presented a comparison of the situation since the present controlled-materials plan was put into effect and that of last May when small manufacturers were forced to compete in the open market for their materials, as there was no priority system in effect. He stated that the prospects of the fourth quarter of this year and the outlook for the first quarter of 1952 are not bright—that many companies are unable to obtain sufficient material to keep their plants operating, even on a break-even basis. He was followed by John H. Stammhaugh, assistant to the Secretary of Agriculture, who answered subcommittee's questions. Adjourned subject to call of the Chair.

Committee Meetings

DPA—PRICE CEILINGS

Committee on Banking and Currency: Michael V. Di-Salle, Director of Price Stabilization, testified and informed the committee that the price-ceiling provisions with respect to manufacturers and processors under the present law are unworkable for the following reasons:

Individually computed prices impose a heavy burden of computation and reporting on business; they are not clear and known to buyers and sellers alike, and no one except the seller can tell whether he is selling in compliance with, or in violation of, regulations.

He also stated that uniform prices have always prevailed in many industries; that is what buyers and sellers want, and they would make allocations easier for the National Production Authority. He believes the proposed substitute, S. 2170, is workable. Mr. DiSalle will continue his testimony at tomorrow morning's meeting, when the committee further considers S. 2170, to amend the Defense Production Act of 1950, regarding price ceilings for manufacturers and processors.

He read a letter into the record from Ned Garver, a pitcher of the St. Louis Browns, in which Garver set down a plan whereby every player's performance record would be reviewed on an annual basis for bargaining purposes.

FATS AND OILS

Committee on Banking and Currency: Deferred action, until after the House convenes in January, on H. R. 5792, repealing section 104 of the Defense Production Act of 1950, dealing with fats and oils. Prior to this action the committee heard testimony on behalf of the repeal from F. Marion Rhodes, Director of the Office of Requirements and Allocations, Production and Marketing Administration.

WAR CLAIMS—TRADING WITH THE ENEMY

Committee on Interstate and Foreign Commerce: Concluded public hearings today on legislation which would amend the War Claims Act and the Trading With the Enemy Act. The first bill to be considered was H. R. 2263, permitting the Alien Property Custodian, after settlement of debt claims, to distribute the remaining money of an ineligible corporation to eligible stockholders, holding less than all the stock, as their interests may appear. (Nicholas R. Doman, attorney of New York City, spoke on behalf of this measure.) Following this testimony, E. W. Pavenstedt, an attorney of New York City, was heard on behalf of H. R. 4284, providing for reimbursement to an American owning either directly or beneficially a part, but less than all, of an enemy corporation taken over by the Alien Property Custodian.

Further considered H. R. 3719, 4345, and 4522, similar measures which would provide for compensation at the rate of \$1.50 per day payable from the war claims fund for unpaid compulsory labor in violation of the Geneva Convention of 1929, and for inhumane treatment of prisoners of war. Testimony favoring enactment was received from Col. C. A. Selleck, Alexandria, Va., and Albert J. Senna, of New Brunswick, N. J. Mr. Senna also spoke in favor of H. R. 1774, which would extend detention benefits to civilian American nationals (now to citizens only) who were interned, forced into hiding to avoid internment, etc., by any government at war with the United States subsequent to December 7, 1941 (now the Imperial Japanese Government). Mrs. Frances

Mary Richard, of Washington, D. C., was also heard in favor of this bill.

George E. O'Brien, of Youngstown, Ohio, spoke on behalf of H. R. 4701, amending the War Claims Act of 1948, to provide for paying the claims of survivors of prisoners of war put to death by the Government of Japan.

Statements were also filed for the record by Frank E. Wilson, of Pasadena, Calif.; Kenneth W. Day, Bellevue, Wash., national adjutant, America Ex-Prisoners of War, Inc.; R. H. Jernigan, Jr., of Ahsoskie, N. C.; Gibbs L. Baker, an attorney of Washington, D. C.; Walter Herzfeld, an attorney of New York City; and Mrs. Georgia L. Lusk, Vice Chairman of the War Claims Commission.

CHEMICALIZED FOODS—COSMETICS

Select Committee To Investigate the Use of Chemicals in Food Products: Chairman Delaney today announced that the committee would hold field hearings in the fruit-growing districts of Washington State and the rich produce areas of California, and at the same time would commence receiving testimony on cosmetics.

The field hearings had been decided upon in response to numerous requests from west-coast fruit producers and processors, entomologists, pharmacologists, and other scientists who will give their views on the use of chemicals in cultivating and processing food.

In view of the fact that the House, on October 15, authorized an investigation of the effect of the use of synthetics in the production of cosmetics, Mr. Delaney also stated that witnesses qualified to furnish the committee with pertinent data on the production of cosmetics would be called upon to testify.

The schedule of public hearings is as follows:

Spokane, Wash., November 13—U. S. district court room, Post Office Building, with headquarters at Davenport Hotel;

Seattle, Wash., November 17—Customs court room, Federal Office Building, with headquarters at Olympic Hotel;

San Francisco, Calif., November 20 and 21—Federal Building, with headquarters at St. Francis Hotel;

Los Angeles, Calif., November 23 and 24—U. S. Post Office and Courthouse Building, with headquarters at Biltmore Hotel.

All local inquiries should be directed to the headquarters of the committee in each city, rather than to the hearing room.

*These figures on measures reported include all placed on calendar or acted on by Senate even if there was no accompanying report. A total of 1,057 reports has been filed in the Senate; a total of 1,227 has been filed in the House.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed."

INDEX

The index is keyed to the DIGEST as published with the CONGRESSIONAL RECORD; the page references below are listed accordingly, as D5, D6, etc.

The bill numbers of proposed legislation are affixed to the subject references so that the subject matter of each measure will be readily available. The breakdown under each subject divides the action on the proposals according to: communications from the President, hearings or actions by House or Senate committee or joint or conference committee, consideration or action by House or Senate Chamber on the measures, and the public law number when the bill or resolution has been enacted.

The use of an index so devised serves a twofold purpose: gives all references to such legislation in the DIGEST as well as accounts for the status and history of each bill or resolution.
